

AGRICULTURE & FOOD

GRAIN SHIPMENTS MINIMISE YOUR RISK

WHEAT TRANSACTIONS: by choosing a few strategic measures, our services can help to monitor the quality of your grain shipments, providing clear, accurate food safety and quality data throughout the loading and discharge process.

- Bureau Veritas' load & discharge port services provides the buyer with comprehensive values of quality per vessel , hold or sub-lot.
- Sub-lot analysis for protein & baking qualities provides clear insight on cargo integrity without additional checks at destination, ensuring the cargo is acceptable for purpose.
- Supervision of weighing, quantity and tally control alongside draft surveying provides peace of mind for cargo quantities.
- Food safety approach to services, monitoring noxious substances, residues, insects, weeds and viruses ensures the cargo meets both the buyers and destination food safety standards.
- Experienced and dedicated wheat graders to identify wheat grades, classes and damage, ensuring the intrinsic values of the cargo are correctly reported.
- Global network of offices and laboratories situated through all wheat-growing regions.

BUREAU VERITAS - WHEAT ORIGIN COUNTRIES

OUR SERVICES
