CHEMICALS & GASSES

It is fundamental for the operational efficiency of a refinery, chemical plant or terminal that a functioning laboratory, with the most up-to-date methods and determination is available, usually on-site. However, due to increasing internal competition for capital, and increasing external technical standards, many in-house laboratories do not receive the funding or technical focus to continue to meet all market and efficiency requirements.

Bureau Veritas has an extensive knowledge of the vast range of chemical products and the related inspection, storage and laboratory testing requirements. Chemicals are tested to ASTM, ISO, IP, and other accepted chemical industry standards and protocols. In-house methods are available where customised procedures are required.

Furthermore, our global network of state-of-the-art laboratories staffed by master chemists is able to provide:

- R&D Analytical Services
- QA / QC Services
- Subcontracting Support
- Full Turnkey Laboratory Outsourcing
- Sampling & Sample Transport Services
- Special projects
- Customized programs: listen to understand your needs and developing a customized program

Key Features

150 years of technical excellence in the Oil & Petrochemicals market

Extensive global network of inspectors, surveyors and laboratories

Precise, dependable and prompt reporting

Independent testing results

Personalized account management

Customer Benefits

Your product expert for chemical products advisory

Broad expertise on any global specification

Accurate results, the first time, every time

Quality assurance executed to the highest standards, trusted by all parties

Account manager will be your primary contact, regional teams available for direct communication 24/7

TESTING & ANALYSIS

Bureau Veritas laboratories offer analytical services with fast turnaround times on testing, reporting and consultancy. Chemical analysis can extend to trace and ultra-trace level impurity determinations. Our chemical testing expertise includes purity & component, trace composition, trace contamination, quality control, troubleshooting, and other chemical analytical expertise.

Our laboratories are engaged in continuous improvement to ensure we consistently achieve best-practice in terms of accuracy, speed, traceability and efficiency and meet the latest legislative requirements.

Our global technical governance team monitors laboratory operations to ensure reliable, repeatable test results.

Key Capabilities

Alcohols, Acids and Bases

Olefins

Aromatics

Plasticizers

Carbonyls

Saturated Hydrocarbons

Chemical Gases

Ship & Shore, Road / Rail / Isotainers
Inspection & Sampling

Chlorinated Hydrocarbons

Solvents

Measurement & Calibration Services

Synthetic Oils & Fats

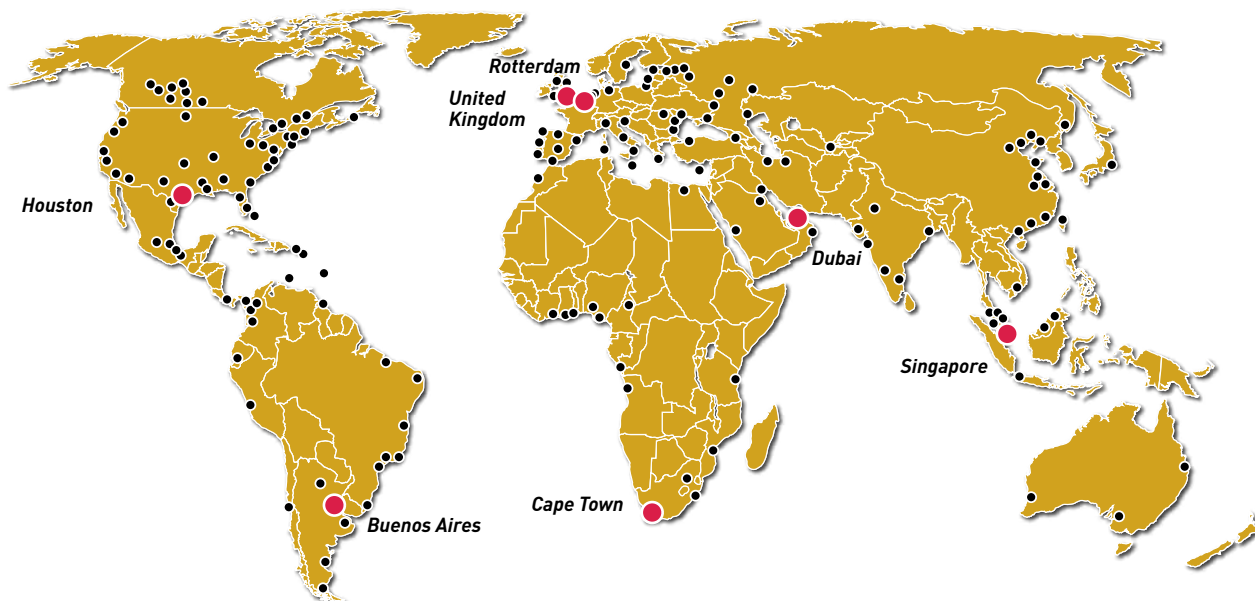

Monomers

Bureau Veritas also provides support across the entire chemicals production supply chain including:

- Audit, survey & assessment of maintenance, design & engineering of sub-contracted activities
- Asset Integrity Management
- Chemical Regulatory Services
- Quality System & Supply Chain Management
- Hazardous Area Product Certification
- Hazardous Area Personnel Safety
- Industrial Technical Inspection Services
- Industrial Consulting Services
- Non-Destructive Testing (NDT)
- REACH Certification
