Agri-Commodities & Fertilizers

FERTILIZERS

Customized inspection & testing services to meet our client's individual requirements

SUMMARY

Our clients demand a consistently high level of service. Equally important is having the flexibility to provide these services tailored to the requirements of each client on a job-by-job basis. A discussion with one of our professional coordinators about your exact requirements allows us to deliver bespoke services to you anywhere in the world. We will then delegate one of our local fertilizer experts to represent your interests at loading, discharge or transshipment and provide rapid reporting of all activities affecting the cargo.

TESTING

Bureau Veritas' leading network of precision testing facilities provide expert analysis for all your testing requirements.

BENEFITS

- Bureau Veritas' strengths lie in the ability and quality of our inspectors who are fully conversant with the demands of their respective specialties.
- Our strong geographical network of offices and coordination services provide customers with a reliable service in a competitive and professional manner.
- We provide rapid communication of relevant on-site information through the network, directly into our client's hands.

INSPECTION

Bureau Veritas' leading network of qualified inspectors provide a thorough portfolio of services, including:

- Hatch and hold surveys
- Radiation certification
- Bag checks
- Supervision of weighing / calibration
- Supervision of transshipment
- Temperature checks / control
- Draft surveys
- Sampling and sealing
- Stowage cleanliness checks
- Photographic essays
- Analysis

MEMBERSHIPS & ACCREDITATIONS

- Bureau Veritas is a member of the International Fertilizer Association (IFA).
- We are an ISO 9001 certified organization and our laboratories operate to ISO 17025 standards.
