SUGAR INSPECTION

Outstanding reputation and trust from the global industry

SUMMARY

Offering services for refined, raw and crystal sugar industries, Bureau Veritas plays a prominent role in the sugar testing, inspection and certification markets. Executing services for goods shipped in bags, transported break bulk or by containers, the group is present along all elements of the supply chain

Bureau Veritas has an outstanding reputation and enjoys the trust of the main traders, growers, refiners, government organizations, through to end user retail and consumers groups within the sugar industry.

NETWORK

Bureau Veritas offers services throughout the main global Sugar production regions:

- South and Central America: Brazil regional operations play an important and integral part of our global sugar services. With operations in Santos & Paranagua, each office can also offer analysis within a fully owned and equipped sugar laboratory. The regional service also extends to Mexico & other Central American countries
- Asia: Thailand is also a key origin with full regional operational and analytical capability to service the Thai raw and refined sugar inspection market.
- India: We are active within the containers export market, in addition to the raw sugar import & break bulk refined exports.
- Middle East: Focusing on exports from refiners or producers (UAE, Sudan) and the main buying destinations (Iraq, Yemen, Iran and Saudi Arabia).
- Europe: France, Belgium, Netherlands, Germany, Ukraine
- Africa: Mainly (but not limited to) Senegal, Guinea Conakry, Côte d'Ivoire, Benin, Ghana, Liberia, Sierra Leone, Mali, Nigeria, Angola, South Africa, Kenya, Tanzania, Uganda, Madagascar, Djibouti, Ethiopia, Somalia, Eritrea, Sudan, Algeria and Egypt.

INSPECTION & TESTING

Bureau Veritas' dedicated sugar inspection teams operate within all the main exporting countries, supported by competent and professional laboratories performing analyses as per current ICUMSA analyses methods and food safety analysis. Inspections are performed per our internal control procedures and applicable rules and standards, including: RSAL (Refined Sugar Association of London), SAL (Sugar Association of London) or NYK 11. Analyses are carried out following ICUMSA methods in force.

BENEFITS

- Extensive global network of offices and laboratories addressing main production regions and destination export locations.
- Consistent inspection, testing methods and techniques throughout the Bureau Veritas network.
- Accepted pre-shipment services by the main Governmental grain buyers.
- Bureau Veritas inspection certification is widely accepted by the international banking and finance industry.
- Fast and efficient reporting of results and issuance of certification.
- Daily reporting including operational photographs during order execution.

MEMBERSHIPS & ACCREDITATIONS

- Bureau Veritas is a member of SAL (Sugar Association of London)
- We are an ISO 9001 certified organization and our laboratories operate to ISO 17025 standards
