# GRAINS AND OILSEEDS

Expertise along the grain and feed supply chain

### SUMMARY

Bureau Veritas truly understands the implications of shipment delays due to insufficient inspection and verification of products. The intrinsic value of delayed vessel loading or discharges in addition to brand awareness and possibly shipment rejection is mitigated by our agricultural specialists. The global grain inspection teams understand the inherent risks and apply their expertise to ensure your supply chain is kept moving.

### TESTING

Bureau Veritas' leading network of precision testing facilities provide expert analysis for all your testing requirements per standard trade contractual terms or customized analysis services.

Experienced chemists provide clear and concise analysis results, operating under international analytical standards and accreditations.

### BENEFITS

- Extensive global network of offices and laboratories addressing main production regions and destination export locations.
- Consistent inspection testing methods and techniques throughout the Bureau Veritas network.
- Accepted pre-shipment services by the main Governmental grain buyers.
- Clear focus on sampling and analysis per incremental subplot quality control.
- Fast and efficient reporting of results and issuance of certification.
- Daily reporting including operational photographs during order execution. Accepted by the international banking and Trade finance industry.

### INSPECTION

Bureau Veritas offer Testing, Inspection and Certification services at every point in the Grain and Oilseeds supply chain; from hold and hatch surveys to loading and discharge supervision. Our inspection services include:

- Inland storage quality assessments
- Inland trucking, rail and barge loading services
- Vessel loading and discharge supervision
- Supervision of weighing, quantity and tally control
- Contractual sampling and sealing
- Temperature control
- Draft survey and tank gauging
- Holds & tanks inspection
- Fumigation and grain dyeing supervision
- Seal breaking
- Storage management, inventory control and stock monitoring
- Damage surveys
- Traceability inspections
- Residue, mycotoxin, aflatoxin and GMO analysis
- Grain quality analysis
- On site continuous sampling and quality control at loading elevators
- Quality and analysis of subplot and hold samples, determining accurate assessment of goods immediately after shipment
- Grading under relevant standards
- Sustainability verification audits

### MEMBERSHIPS & ACCREDITATIONS

- ISO 9001 certified organization and our laboratories operate to ISO 17025 standards.
- Laboratory trade accreditations held for: GAFTA, FOSFA, AOCS, NOPA, NIOP.
- RTRS - Round Table on Responsible Soy
- ISO 17020 accredited inspection offices.
- GMP - Good Manufacturing Practices
- HACCP - Hazard Analysis and Critical Control Point
