

BUREAU VERITAS

Oil & Petrochemicals

Airports & Airlines

Global Oil & Gas Testing Services
for the Aviation Industry

**BUREAU
VERITAS**

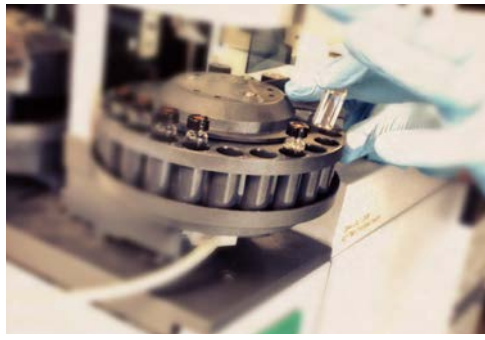

Airports & Airlines

Bureau Veritas helps to ensure that only fuels that meet specifications reach an aircraft. We monitor fuel quality through the various stages of delivery via pipelines, marine vessels, trucks, rail cars, storage tanks and aircraft refuelling vehicles. Our network of professionals provide cargo and inventory inspection, sampling, and laboratory analysis of all types of jet fuel to standards such as ASTM D1655, DEFSTAN 91-91, and Military Specifications.

In addition to quality control of the product to the aircraft, Bureau Veritas also offers condition monitoring of lubricants and hydraulic fluids to support asset integrity programs.

Key Features	Customer Benefits
Extensive global network of inspectors, surveyors and laboratories	Ability to collect, ship and test your fuels anywhere, any time
Independent testing results	Quality assurance executed to the highest standards, trusted by all parties
In-house Additives Division	Ability to deploy at a moment's notice to treat off spec product
Global LOAMS SM OCM Platform	Exclusive software that brings clarity and meaning to complex laboratory results and maintenance recommendations that improve production and save money
Personalized Account Management	Account manager will be your primary contact, regional teams available for direct communication 24/7
IATA Strategic Partner	We fully understand the industry's challenges and help to improve performance

Testing & Analysis

Bureau Veritas laboratories offer analytical services for jet fuels, lubricants and hydraulic fluids with fast turnaround times on testing and reporting. We support our customers with specialised sampling and logistics arrangements.

Our laboratories are engaged in continuous improvement to ensure we consistently achieve best-practice in terms of accuracy, speed, traceability and efficiency.

Our global technical governance team monitors laboratory operations to ensure reliable, repeatable test results.

Key Capabilities

Aviation Gasoline Fuel Testing

Jet Fuel Testing
(A1, DEFSTAN, Kerosene)

Bio Aviation Fuel Testing

On-site Laboratory Operation & Support

Filter/Debris Analysis

Sample Pick-up & Logistics Services

Fluid Testing
(Engine, Gearbox & Hydraulic Oil)

Tank Sampling/Gauging

Jet Fuel Additives/Cargo Treatment

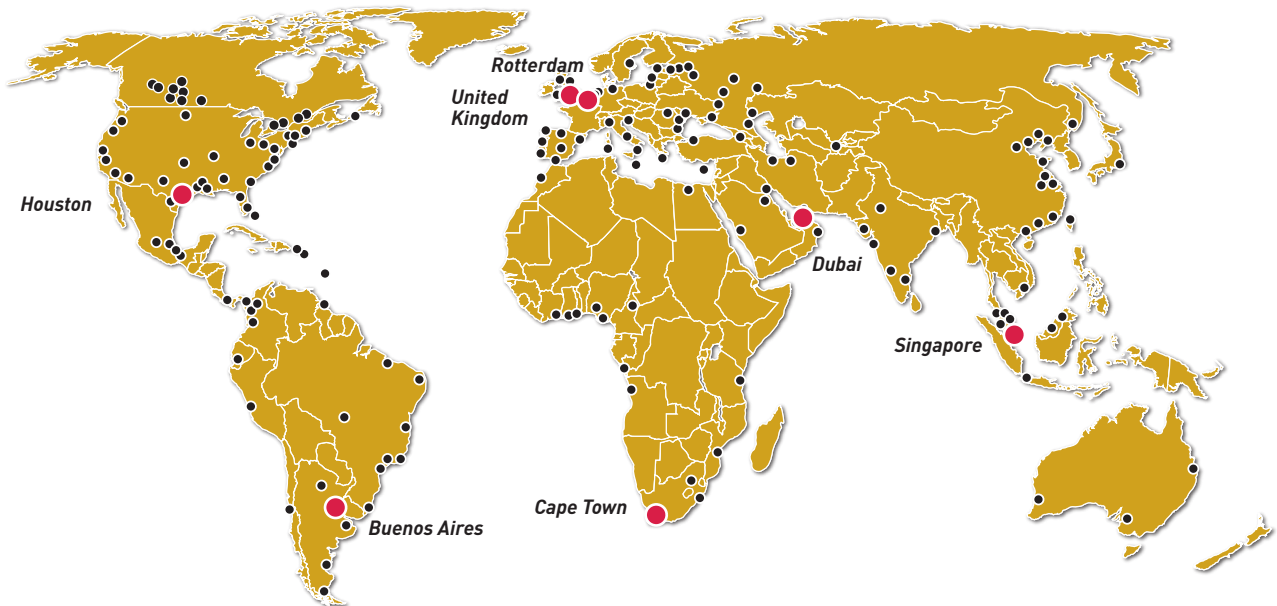

Water Content

Bureau Veritas also provides support during the design, construction, commissioning and operation of airports and aircraft, including:

- Functional analysis
- Reliability studies
- Stress analysis
- Certification of embedded software and on-board equipment & systems
- Management of the overall certification process (CS-25)
- Quality system and supply chain management
- Audit, survey & assessment of maintenance, design & engineering of sub-contracted activities.
