Retail Fuel Quality

Fuel stations manage multiple product streams, when an issue occurs regarding quality this can cause a risk to reputation and damage to corporate image. There is also the need to comply with stringent product, environmental and safety legislation. We offer a range of services to assist in the implementation of routine compliance/quality monitoring programmes, including routine sampling and testing, sample collection and product contamination checks.

Should you encounter a fuel related problem we can provide rapid response with expedited testing in order to help resolve the issue.

Key Features	Customer Benefits
Structured Fuel Monitoring Programme	Assurance of compliance with specification at the point of sale of the fuel
150 years of technical excellence in the Oil & Petrochemicals market	Your product expert for fuel and lubricants
Extensive national and global network of offices and laboratories	Ability to test your fuels anywhere, any time
Precise, dependable and prompt reporting	Accurate results, the first time, every time
Personalized Account Management	Account manager will be your primary contact, regional teams available for direct communication 24/7
Independent and impartial testing results	Quality assurance executed to the highest standards, trusted by all parties

Testing & Analysis

Bureau Veritas' laboratories offer a range of analytical services from full scale testing on purchased fuels to on-site inspections to assure proper storage minimising the risk of contamination/bacterial growth or ageing of the fuel. We support our customers with specialised sampling and logistics arrangements to strengthen their Quality Assurance and compliance programmes.

Our laboratories are engaged in continuous improvement to ensure we consistently achieve best-practice in terms of accuracy, speed, traceability and efficiency. Our global technical governance team monitors laboratory operations to ensure reliable and accurate test results.
